Services for 30 days after graduation

Graduating students currently eligible for services at Campus Health will only be able to use Campus Health and CAPS for 30 days after the original academic calendar graduation on May 16, 2021. You will be eligible for services through June 15th. This includes onsite visits as well as telehealth services. You will be eligible to access your 2nd dose of a COVID vaccine if your 2nd dose date falls after June 15th.

During this time period your primary care provider at Campus Health will be happy to work with you to explore possible provider options in the local community. There are multiple ways to schedule an appointment at Campus Health. You can request an appointment using our secure web portal healthyheels.unc.edu [1] or call Campus Health to schedule an appointment (919) 966-2281.

A complete copy of your Campus Health medical record can be forwarded to your new provider of care by completing the release of information form found in the forms section of the Campus Health website [2].

If you are enrolled in the UNC System Student Health Insurance Plan for the Spring semester your insurance plan will terminate July 31, 2021. Visit the website to learn more about insurance options when no longer in school [3].
