

10 Quick Strategies for Stress Management

1. **Organize Yourself.** Take better control of the way you're [spending your time and energy](#) [1] so you can handle stress more effectively.
2. **Control Your Environment** by controlling who and what is surrounding you. In this way, you can either get rid of stress or get support for yourself.
3. **Love Yourself** by showing yourself compassion. Extend compassion to yourself when things get hard or when you mess up. Know that you deserve compassion just like you would show a friend. Everyone goes through difficult times and challenges. You are not alone.
4. **Reward Yourself** by planning leisure activities into your life. It really helps to have something to look forward to.
5. **Exercise [2] Your Body** since your health and productivity depend upon your body's ability to bring oxygen and food to its cells. Therefore, exercise your heart and lungs regularly. Move your body a minimum of three days per week for 15-30 minutes. This includes such activities as walking, jogging, cycling, swimming, aerobics, etc.
6. **Relax Yourself** by taking your mind off your stress and concentrating on breathing and positive thoughts. Dreaming counts, along with [meditation](#) [3], progressive relaxation, exercise, [listening to relaxing music](#) [4], communicating with friends and loved ones, etc.
7. **Rest Yourself** as regularly as possible. [Sleep](#) [5] 7-8 hours a night. Take study breaks. There is only so much your mind can absorb at one time, it needs time to process and integrate information. A general rule of thumb: take a ten minute break every hour. Rest your eyes as well as your mind.
8. **Be Aware of Yourself.** Be aware of distress signals such as insomnia, headaches, anxiety, upset stomach, lack of concentration, colds/flu, excessive tiredness, etc. Remember, these can be signs of potentially more serious disorders (i.e., ulcers, hypertension, heart disease).
9. **Feed Yourself/Do Not Poison Your Body.** [Eat a balanced diet](#) [6]. Avoid high calorie foods that are high in fats and sugar. Don't depend on drugs and/or alcohol. Caffeine will keep you awake, but it also makes it harder for some to concentrate. Remember, a twenty minute walk has been proven to be a better tranquilizer than some prescription drugs.

10. **Enjoy Yourself.** It has been shown that happier people tend to live longer, have less physical problems, and are more productive. Look for the humor in life when things don't make sense. Remember, you are very special and deserve only the best treatment from yourself.
