## A MESSAGE FROM THE DIRECTOR

These numbers and accomplishments for 2021-2022 are only part of our story. Our story includes the commitment of my Campus Health and CAPS colleagues - comprising over 150 providers and staff - to continually change, pivot and adapt (during a pandemic, no less!) so that we meet the medical and mental health needs of Carolina students. Balancing quality service and access for our students while improving the well-being of our staff within an inclusive and equitable environment will continue to be our focus. It's not easy work but our students expect and inspire us to be critical partners in their Carolina experience, and time and time again, our staff prove that they are up to the challenge. I couldn't be more proud of and grateful for them!
